Sorry,

Your question is not clear. I have no idea what you are asking.

In any case, this seems like the sort of question that would be better posed to support.

Please open a ticket:

I installed the new 5.5 and does not take the changes in memory, had to go back to the previous version 4.5 .02 so everything works, my question was why does not the 5.5, someone has my same problem.
now you understand my question?

No, I'm sorry. I still don't understand. What, precisely, does not work?

HI,

I'm sorry -- I still don't understand your question.

Please open a support ticket.

Best regards,

B.J. Buchalter
