Hi people, just updated to latest version of console and can't find the Multiband stuff???
I own a +DSP machine too??

The Multiband Dynamics and Expander plug-ins are not in +DSP at this time; they will be added in the future.

When will be available the multiband in +dsp? Is there a release date?

My best regards

This is a little bit disappointing meanwhile. All the nice AAX native stuff with new UI , no MIO updates or even special price promotions for long years MH customers for those AAX plug ins. DSP performance issues expected ? I guess so. Pls work on a - professional (!) - DSP upgrade Board for ULN 8 and LiO 8 users with enough power to host a min. of 8 instances of Halo rev and 8 instances of multiband compressor .

tompisa wrote on Wed, 19 September 2012 15:08... or even special price promotions for long years MH customers for those AAX plug ins.

This is not correct; we offer special pricing on the AAX plugins for all +DSP owners; that was announced with the introduction of the plugins and continues...

Yes, you are correct, I was wrong
apologize

When will be available the "Multiband, DeEsser and HaloVerb" in +DSP?

Is there a release date?

My best regards

Hi - I know that 2012 is long ago but i just wanted to say that it is possible to build your own Multibandcompressor with Graph.
I tried it yesterday.
it is easier than i thought.
kind regards
