Hi, i am running reaper on my machine and every session that has the Metric multiband dynamics has a strange behaviour. Plugin don't insert on slots, pans change randomly, everything is weird when using this plugin, its the only one that does it. i use the channel strip without any problem .Anyone with the same symptoms ?

Reaper 5.962

Multiband Dynamics 2.0.3

Thank you

Another thing is, no VST3 for this plugin, so sidechain not working in reaper .

One year has passed and no answer for this problem.

Developers on reaper side say its a Metric halo plugin issue, or something related to the way the window is managed.

I bought the plugin to not use it, maybe i should ask for a refund ?
