Hello, I've searched with not much luck. I'm trying to take advantage of the MH production bundle and other plugs when using Pro Tools. I am new to this, but I was hoping some of you may have seen or have some links to help me understand how this software can be used and function with Pro Tools.

Thanks!

Thanks, I suspect most are using Cubase and Logic. I'll see if there any publications I can purchase.

Hi buddy, Cubase and logic is something I am using personally. Worth it!
