Hello everyone,

I'm a PC user (RME hdspe AES and MADI) with RME converters. Now I want to switch from RME to Metric Halo converters. I don't understand if I can buy the LIO and use it without PC (or MAC). I need only the AD/DA converter in stand alone mode, anche the analog monitor out. AN1--->AES1 and so on for 8 channel. I don't understand if all the time I need to do a reboot with a MAC. I use it for classical music recording in locations.

What is the most less expensive solution to control the LIO? I need a MAC OS 10? (Maybe a less expensive old Mac Mini or a tablet?)

Thank in advance.
