Questions, comments ...

1- Is it/could it be possible to use the 3D USB connection for stand alone outboard DSP operation? So say connected to a 32 channel X32 mixer usb port it could be used for plugin effects expansion, as an alternative to say using Multirack and Waves plug ins?

2- Is an AES 50 Edgecard, or stand alone MH Link to AES50 box in the cards?

3 - If no AES50 connection is in the cards, How about an MH link card for the Behringer X32 mixer, so that MH interfaces can be used as a 32 channel stage box or outboard Plug in DSP that way? Maybe simply using a usb to MH Link protocol.

Thanks for any comments.
