I blew the thunderbolt ports of my MBP and the FW port of my ULN-2 sometime ago.
I was told the 3D upgrade would fix my problem
I cannot connect through USB or the USB to Ethernet adapter.
Is the only way to get around it to replace the logic board of my MBP?
Getting pretty desperate.

Does the USB work with any other devices?

Well, then it should work with the MIO.

Please open a support ticket <https://mhsecure.com/support>

That's what I thought as well.
Sent Jon some pictures a minute ago.

Thanks
