It has been a very long time since the last beta. Can you say when the standalone operation for 3D will be available ? It was a wonderful feature with the 2D versions, just using multiple setups on my ULN8 and LIO without a computer.

pb10 will not include boot states.

pb11 will. I am not promising, but I hope to have pb11 out the door in May.

Any Updates on Beta 10?

thanks

Stephen

or even a final version ? after all those years :lol:

@BJ I think it would be appropriate to give at least a verbal update and say if anything happens at all ? What is so insanely difficult to store boot states in the device?
