Hi everyone!

I have a problem with my ULN-2. The power supply no longer working (the green light does not light up anymore), I wanted to power the sound card via the firewire, which was working a few days ago. But since then, it doesn't light up anymore, and I hear, at regular intervals, a little snap inside, as if it was running out of power.

Any opinions? :(

Did you have any luck fixing this issue?

My 2882 is in the same predicament atm...
