Hello people,

Something weird happen when i want to add a second group to my main template: it duplicates the first group (same color, same all), but don't create a new one (but the group 2 is available in the bus assign area!). To get a second group i need to indicate in the "configure mixer" THREE groups (?). In any case, when i save this one, quit and relaunch, something wrong happen and the template is no valid.

I precise that when i do the same operation on my others templates it works.

Have you ever encountered a problem like this? How to solve it? (don't want to rebuild all my mixer...)

Thanks.

Barnes41

There was a bug with deleting groups. The current version of MIOConsole3d should have this fixed.
