Hey,

I have one LIO-8 (for now) and just bought a summing mixer, Burl B32.

- what's the best way to set this up
- to take advantage of all the 8 outs for summing, is it possible or advisable to use the headphone outs as the main monitor outs since they are in addition to the 8 outs (I believe), but wouldn't quite know how to set that up (I have a drwamer monitor controller)

Any advice much appreciated!

Thanks!
