Hi all, (apologies if this has been addressed somewhere else).

I have rooms in the facility, 1 room has 2 x ULN-8, the other room has 1 x ULN-8.

Currently, they connect directly to their macs via ethernet, the 2 x ULN acts as 1 unit via MHLINK.

I'm hoping there is a way that I can connect all 3 ULN's to the house router/switch and choose to see all units as a 3 x aggregate, with the ability to choose the 'primary' unit.

This would be ideal for being able to use the studio in room A to track alongside the bigger room with the 2 units, essentially creating 1 master system.

Is this possible currently?
