Hi all. Jon says this should work, but I'd like to see if there's any real world use out there.

I'm using a 6 core 2010 5.1 MP With Mojave, a 2d ul-n and 2882.

I'm going to get the 3D cards as I know I'll need to upgrade the Mac at some point.

So, anyone using this old tech with 3D?

Does the new software work ok on Mojave? Any issues?

What CAT cables are you using?

I'd be grateful for some experiences/advice. Otherwise I'll keep them 2d until I upgrade.

Thanks

Stephen
