Hello. I am about to order a new MIO2882 and was wondering if there were any known issues with the MIO drivers/software and Snow Leopard?
I did some searching but could not find much info...

thanks in advance,

FP10.

There are no known issues regarding operation under Snow Leopard when using the currently shipping driver.

so,
ordered the 2882. was sitting at my doorstep a day and a half later.
plugged it in, set up some routing for 16 inputs, CR out, 2 cue mixes, a little tracking verb and was recording a full band that nite.

happy camper
