Hi there,

I am in the North of Portugal in the final stages of a project with impending deadline and my 2882 broke down this morning. Bought my unit in Germany, and the German support could send one from there (which takes time I do not have), the Portuguese distributor has no units, so I wonder:

is there anyone in the North of Portugal who could borrow/rent out her/his 2882+PWS for 2 weeks (starting now)??

Please get in touch. Thanks & all the best,

Marc

P.S. I registered in this forum just now because of the urgency of the problem I am experiencing since this morning

Marc,

Sorry to hear that you are having problems.

You should probably subscribe to and send an email to the Mobile I/O list as I believe that there are more folks that will see it there than here (it has been around for a lot longer than this forum).
