I bought a LIO 8 and now old like to get the connectors I will need.

In a perfect world is like to have 4 spdif, 2 AES and 2 optical on the digital side. 8 instrument TS or TRS and 2 XLR. Not sure how to achieve this the best way. Seems like spdif is not supported and have no idea about optical. I think the analog input side is pretty simple just mostly wondering about digital input options. Most of the gear I would want to use would have spdif RCA connectors and I would also like the option of at least 1 optical toslink input
