Hi there,

So i've created some aux buses for submixes, but I can't select the i/o plugin on these and it seems to be greyed out.

Anyone know why?

Hi,

You've probably figured it out, but just in case, I've recently set up a few external reverb sends in MIO console and this is what it looks like:

If any I/O ports are grayed out, I think it's because they've already been assigned to other channels in your mixer.
