Hello,

I decided to hard reset my Metric Halo to see if I could get my ADAT outputs to work correctly. I then uploaded the current firmware, but it is now locked to 96k, and seems to have no serial number -

It's been years since I had to do anything to this unit (it's pre 2d card), as it has been rock solid - I'm not sure how to get it back up and running -

Any help would be greatly appreciated!

Phil
