Hi Everyone!

I am new to this forum, but I have been using my legacy ULN-2 +DSP since 2008. I wanted to route the digital input of it directly to the monitor out to use it as a very good DAC, and I was not able to do it. So i erased all the states ... Yeah I know, it was a reckless move. My problem is that I am not able to get any sound out from the box since I erased all the states. Not even sounds from a DAW or CoreAudio sounds. Does anybody have a clue? I attached some screenshots.

I use a 2009 macbook pro with osx 10.11.6.

Many thanks!

Best,
Daniel

I was able to solve it, i disconnected the box from the power supply, reconnected after a minute and everything started to work again :)

Best,
Daniel,
