Well, the Pro Tools subscription process is not working for me so I've decided to move on. I'm curious what DAWs the MH group is using that's fairly straightforward to set up with MIO console but still has that PT feel. I'm composing with audio and using virtual instruments to start and will want to take advantage of the MH DSP load. I've looked at Reaper and I'm checking out Studio One ... again, just curious what the group here finds success with.

Thanks!

It doesn't really matter.

I'm using ProTools, Digital Performer, Reaper, Live, Reason with MH Console and all are working great. (not using VI on ProTools)

Reaper is great for music...

I wouldn't expect too much of the DSP, except for input processing and monitoring EQ.

Fair enough, I'll keep that in mind.

Thanks for your thoughts!
