Hi MH team,

just wondering when a version of MIOConsoleConnect plugin will be available for the 3D Console.
I'm looking forward to get to work with MIOconsole chained to my DAW again!

best,
Marzio

I'm very curious about this as well. I recently bought a ULN-8 3D and would like to not only use it for tracking but also for summing / mixing. The MIOConsoleConnect Plugin for 3D would be really helpful.

Kind of came to ask this same question (or a variant), I just got my box updated to 3D and have, hence, jumped several console versions. Is there no way to use MIO plugs inside the host DAW currently?
