The help documentation on the installation disk shows a Monitor Control configuration where an "iTunes" source is visible.

I have managed to recreate this just superficially but I can't actually link to the actual application. Any tips on how to make this work?

Thank you

Paul

In that case it is not an actual link to the application. It's just a source for Host 1+2 (or wherever we had the "speakers" set for computer audio in Audio MIDI setup). Naming it iTunes is perhaps a bit misleading. Sorry about that.
