Hi everybody,

I own an ULN8 and a 2882 (both of them 3d) and I use the latest Mio Console firmware.

I would like to use a midi controller, especially to get the ability to control on a hardware the headphone volume, monitor out, headphones circuits etc..

Is there a kind of midi learn with the Mio Console?

Did someone already used the Keith McMillen Kmix for such an usage?

Many thanks in advance,

Jean-Philippe
