yep. There is an icon that says, "purchase manual" or something like that. It doesn't go anywhere. I use logic pro x. Anyhow.

never mind. It's in the MIO 3d help, then "open manual". I just upgraded from a cluster of apogee elements and just through the monitors via my headphones it sounds different. I'm trying to figure out how to link the mio to logic. So I'm like one years old.
